

2015-07-28 CGSync Meeting notes

Date

 28 Jul 2015 - Last meeting

Attendees

- [Thomas Cherry](#)
- [Christopher Gokey](#)
- [Chris Durbin](#)

Questions

- New API features
- Durbin Vacation starting next week, Myrtle Beach, will have fun
- Caching KMS is next for CMR
- Providers (Archiving centers) next
- then platforms/instruments, Locations upcoming
- Projects may be working now
 - buckets for projects may not be as important, lets talk about this if we have time, but GCMD could auto bucket by first letter without getting explicit buckets from CMR.
- CMR looking at adding some fields for indexing
- Highlighting is on SIT, went out yesterday.
 - `include_highlight=true`, still can not specify the delim., so it's using `` tags
- Temporal is out
- more talk on a "reviewed flag", Dana is currently controlling the schedule of this.
- SIT deployment may move to nights.
